    style: TextStyle(color: Colors.teal),
  ),
],
```

Flag 2

NOTE: The comment in the code is from flutter create command

```

body: Center(
  // Center is a layout widget. It takes a single child and positions it
  // in the middle of the parent.
  child: Column(
    // Column is also a layout widget. It takes a list of children and
    // arranges them vertically. By default, it sizes itself to fit its
    // children horizontally, and tries to be as tall as its parent.
    //
    // Column has various properties to control how it sizes itself and
    // how it positions its children. Here we use mainAxisAlignment to
    // center the children vertically; the main axis here is the vertical
    // axis because Columns are vertical (the cross axis would be
    // horizontal).
    //
    // TRY THIS: Invoke "debug painting" (choose the "Toggle Debug Paint"
    // action in the IDE, or press "p" in the console), to see the
    // wireframe for each widget.
    mainAxisAlignment: .center,
    children: [
      SizedBox(
        width: 200,
        height: 200,
        child: Image.asset('asset/images/Cat.jpg', fit: BoxFit.cover),
      ), // SizedBox
      Text('jake fiel Sugang', style: TextStyle(color: Colors.teal)),
    ],
  ),
),

```
